UNITED NATIONS WAR CRIMES COMMISSION

FIRST LIST OF WAR CRIMINALS

1. This first list of war criminals prepared by the War Crimes Commission is limited to Germans.
2. The list comprises the names of men whom the Commission is satisfied are responsible for the commission of a war crime of reasonable importance and is also satisfied that there is or will be at the time of trial sufficient evidence available to justify a prosecution. In a few cases, where the names are not known, the information given should be sufficient to identify the individual.
3. The Commission has on its registers a number of other cases submitted by the National Offices where the information available at present is not sufficient to justify the inclusion of the individuals in the present list. As the Allied forces progress it may be expected that further information will become available which will enable National Offices to complete many cases already registered, and to submit a number of other cases. These will be made the subject of later lists.
4. The Moscow Declaration contained a provision that the major criminals whose offences have no particular geographical location will be punished by a joint decision of the Governments of the Allies. Some of the men who fall within this provision have been the subject of charges submitted by the National Offices, some have not. The Commission has thought it expedient to collect copies of decrees, orders or enactments, and also any other information which has been found, showing the connection of some of these individuals with, and their responsibility for, war crimes committed in occupied territory. The information which is being collected is at the disposal of the Allied Governments or their representatives.

SECOND LIST OF WAR CRIMINALS

(ITALIANS)

ITALIAN WAR CRIMINALS - FIRST LIST

I N D E X

Charges brought by:	Page
FRANCE	1
UNITED KINGDOM	2
YUGOSLAVIA	6

-
1. As in the case of the list of German war criminals already presented, this list comprises the names of men believed to have been responsible for the commission of a war crime as to whom the War Crimes Commission is satisfied that there is or will be, at the time of trial, sufficient evidence available to justify a prosecution. In a few cases where the names are not known, the information given should be sufficient to identify the individual. The Commission has on its registers a number of other cases against Italians submitted by the National Offices where the information available at present is not sufficient to justify the inclusion of the individuals in the list. These cases will be the subject of later lists, when further information has become available.
 2. The present list includes the name of only one individual who would probably be regarded as falling within the principle enunciated in the Moscow Declaration as to persons whose war crimes have no geographical location.
 3. The Commission again calls attention to the recommendations which it addressed to the Governments of the United Nations as to the arrest of members of the police or security organisations of the Axis Powers who have been employed in the occupied countries of Europe - such as the Gestapo, the S.S., the S.A., or other similar formations.

1. The present List of War Criminals is limited to Germans. It forms a continuation of the Commission's List No. 1.
 2. As in the case of the previous lists, this list comprises the names of men believed to have been responsible for the commission of a war crime as to whom the Commission is satisfied that there is, or will be at the time of trial, sufficient evidence to justify a prosecution. In the cases where the names are not known, the information should be sufficient to identify the individual.
 3. In certain cases the Commission has accepted charges brought by a United Nation against a person already placed on the Commission's List No. 1 as a result of previous charges by the same United Nation. The name of each of these persons will be found at the end of the section containing this United Nation's charges, with a reference to the place in List 1 where particulars concerning him will be found.
 4. Where in column 5 a person is said to be wanted by another United Nation the reference is to the present list unless otherwise indicated.

LIST OF SUSPECTS

LIST OF WITNESSES

Persons wanted as witnesses by Australia 14

1. The LIST OF WAR CRIMINALS contained in the present document is the first to deal with Japanese war crimes and is limited to such crimes. Like the previous Lists, it comprises the names of men believed to have been responsible for the commission of a war crime as to whom the Commission is satisfied that there is, or will be at the time of trial, sufficient evidence to justify a prosecution.
2. The document also contains two new Lists which the War Crimes Commission on 14th February of the present year resolved to present to the Governments. These are

LIST OF SUSPECTS
LIST OF WITNESSES

3. The LIST OF SUSPECTS, in addition to individuals, includes units of which members not up to the present identified have been involved in a war crime without the unit as such being implicated. The Commission recommends that the personnel of the named units should be taken into and maintained in custody until it has been possible to identify the persons who should be handed over for trial as war criminals.
4. The LIST OF WITNESSES comprises enemy persons not accused or suspected of war crimes who are considered capable of giving evidence regarding war crimes. The Commission recommends that contact be maintained with these persons until their evidence has been taken and that measures be adopted to protect them against other enemy nationals. If they are prisoners of war they should be maintained in custody until their evidence can be taken and, in proper cases, should be segregated from other enemy nationals who are in custody.

PART III. - SECOND LIST OF WITNESSES

1. The present document is divided into Parts corresponding to the three different kinds of Lists which it contains, and this system will be followed for the future in all cases in which more than one kind of List is contained in a single document. The serial numbering of the documents as "List No. 1", "List No. 2", etc. will not be altered.

2. The List of War Criminals contained in Part I is the first to deal with Albanian, Bulgarian, Hungarian and Rumanian war criminals. Italian war criminals are also listed.

3. As explained in the introductions to previous lists, the persons appearing in the List of War Criminals (Part I) have been placed on that list because the Commission believes them to have committed or been responsible for the commission of war crimes and is satisfied that there is, or will be at the time of trial, sufficient evidence to justify their prosecution.

4. The List of Suspects and the List of Witnesses, which first appeared in the document numbered List No. 4, are proposed in virtue of a decision of the Commission of 14th February 1945. The purpose of their original inclusion was for the operative part of a recommendation accepted by the Commission on 7th March 1945 and addressed to the War Governments. The text is as follows:

"The Commission recommends that the Governments should give all necessary instructions to ensure -

(1) The taking into custody of the individuals and writs named in the Lists of Suspects and their maintenance in custody until it has been possible to identify the persons who should be handed over for trial as war criminals;

(2) The maintenance of contact with the persons named in the Lists of Witnesses until their evidence has been taken, and measures to protect them against other enemy nationals;

(3) The maintenance in custody, if they are prisoners of war, of persons named in the Lists of Witnesses until their evidence can be taken and, in proper cases, segregation of such witnesses from other enemy nationals who are in custody."

LIST No. 7

April, 1945

**UNITED NATIONS
WAR CRIMES COMMISSION**

**LIST OF GERMAN WAR CRIMINALS
HOLDING KEY POSITIONS**

In preparing and presenting this List to the Governments, the Commission desires the further investigation of those herein listed, in order to initiate or supplement on their to the extent deemed justified and to amplify dossiers against each person so listed.

This expression is used, not in its technical legal sense, but as the best general description of the whole complex of measures by which the German deliberately organized a reign of terror in Europe, deportation and enslavement, starvation, attempted extermination of particular races and classes, and many other crimes with some or all of which the persons listed have been in varying degrees implicated.

The persons listed are charged with systematic terrorism or completely in systematic terrorism.

The agencies charged by the Governments with responsibility for apprehension of war criminals should, if the names of the accused persons do not appear in one of the Commission's other Lists at the instance of a Government, apply to the Commission for instructions as to their disposal.

Many of the persons included in the present List have appeared in former Lists as the subjects of charges by particular United Nations. It has been felt that it would be convenient to bring all the names together. The List is, however, not intended to be exhaustive or final; on the contrary additions to it are contemplated in the future.

The present List, which in the first compiled by the Commission in execution of this decision, also contains the names of persons who, although they may not fall within the description of the Moscow Declaration, have held positions of authority in the Government of the regions or agencies connected with their names and must be treated as responsible in virtue of their official position for the various atrocities which have been committed within the sphere of their competence.

On September 26th, 1947, the United Nations War Crimes Commission considered the case of persons whose crimes consist less in the perpetration of specific atrocities than in their having acted as ringleaders in the organization of war crimes - the class of person whose ultimate fate is reserved in the Moscow Declaration for a decision by the United Nations. It unanimously decided that the names of these persons should be included in the Commission's Lists of War Criminals without waiting for the initiative of particular Governments. When taking this decision, the Commission felt it would be unnecessary to compile a voluminous documentation concerning each of these persons as their activities were notorious (See Minutes of 37th Meeting, September 26th, 1947; M.33, p.5).

UNITED NATIONS

WAR CRIMES COMMISSION

SECOND LIST OF WAR CRIMINALS
HOLDING KEY POSITIONS
(GERMANS)

SECRET

UNITED NATIONS WAR CRIMES COMMISSION

SECOND LIST OF GERMAN WAR CRIMINALS HOLDING KEY POSITIONS

On September 26th, 1944, the United Nations War Crimes Commission considered the case of persons whose crimes consisted less in the perpetration of specific atrocities than in their having acted as ring-leaders in the organization of war crimes - the class of person whose ultimate fate is reserved in the Moscow Declaration for a decision by the United Nations. It unanimously decided that the names of these persons should be included in the Commission's Lists of War Criminals without waiting for the initiative of particular Governments. When taking this decision, the Commission felt it would be unnecessary to compile a voluminous documentation concerning each of these persons as their activities were notorious (See Minutes of 33rd Meeting, September 26th, 1944; M. 33, p. 5).

List 7, issued last April, was the first List compiled by the Commission under the above decision. The present List is a continuation of List 7. Like List 7 it contains the names of persons who, although they may not fall within the description of the Moscow Declaration, have held positions of authority in the government of the regions or agencies connected with their names and must be treated as responsible in virtue of their official position for the various atrocities which have been committed within the sphere of their competence.

Many of the persons included in the present List have appeared in former Lists as the subjects of charges by particular United Nations. It has been felt that it would be convenient to bring all the names together. The List is, however, not intended to be exhaustive or final; on the contrary additions to it are contemplated in the future.

The agencies charged by the Governments with responsibility for apprehension of war criminals should, if the names of the accused persons do not appear in one of the Commission's other Lists at the instance of a Government, apply to the Commission for instructions as to their disposal.

The column showing the crimes with which the persons listed are charged which appeared in List 7 is omitted in the present List, since all the persons comprised in it are charged with systematic terrorism or complicity in systematic terrorism.

This expression is used, not in its technical legal sense, but as the best general description of the whole complex of measures by which the Germans deliberately organized a reign of terror in the occupied regions of Europe - measures including mass murder, torture, deportation and enslavement, starvation, attempted extermination of particular races and classes, and many other crimes with some or all of which the persons listed have been in varying degrees implicated.

In one case, -No. 33, the person charged, Admiral Karl Dönitz, is believed to have also been guilty of violation of the laws and customs of naval warfare.

In preparing and presenting this List to the Governments, the Commission desires the further investigation of those herein listed, in order to initiate or supplement charges to the extent deemed justified and to amplify dossiers against each person so listed.

- A-2 Cases against enemy military and civilian personnel where evidence is sufficiently complete to charge them as having been concerned in the commission of war crimes, either by having encouraged them, condoned in them, or in any other way shown their responsibility for them.
- B Cases not falling under A-1 or A-2, but where any named enemy individual or military or civilian enemy personnel in authority should be held for interrogation as material witnesses after the cessation of hostilities
